## TEACHING PHILOSOPHY

As an educator, I want to create an environment that is beneficial for students to learn collaboration in, as well as provide a safe and comfortable space for the students to grow in. As a theatre educator, I want to provide every opportunity for my students to learn skills applicable on the stage, as well as in their personal lives and in other career paths. Overall, I want to leave my students with the knowledge that what they learn in my classroom - both academically and socially - is applicable in every aspect of their lives, and that they will be better equipped for their future because of it.
